## Pocket Spring

Each spring in the Pocket Spring System is individually encased, enabling it to provide more points of support and distribute pressure evenly

The result? A mattress that perfectly supports your body, no matter your sleeping position.

### TIP-TO-TOE SUPPORT

A consistent feel throughout, with good support

### ANTI-HAMMOCKING

Coil independency stops hammocking effect - no drooping or dents!

### COMFORT & BACK SUPPORT

A more even pressure distribution, allowing a more natural spinal alignment

### SUPPORTIVE STRUCTURE

More points of support make mattress more responsive to pressure

### MINIMAL PARTNER DISTURBANCE

Ensure a peaceful night for two

All about sleep, and you

\*Pillows and Beddings are not included | Nightstands are sold separately | Removal service for old mattresses and bedframe is not provided
